How to turn an APK file into Jar using Dex2Jar

This folder contains all the necessary files to run the Dex2Jar program in order to turn an APK file into Jar (for use with other tools).

Simply run this command on Linux or Mac OSx:

sh d2j-dex2jar.sh *yourapk.apk*

You may need to give permissions to the d2j_invoke.sh file. Use this (if on Linux or Mac OSx):

sudo chmod -x d2j_invoke.sh
